

Companie(s) :	Kampangphet Viwat Construction Co., Ltd
Owner :	Department of Highways
Subsidiary(ies) :	Freyssinet Thailand - Menard
Beginning of works :	05/2007
End of works :	05/2007

Description of the work :

The Seri-Thai flyover bridge is across the Minburi interchange with cast in-situ box-girder of internal multi-strand system. This project was completely well constructed as required by the main contractor. Unfortunately, fire accident forms the pedestrian damage elastomeric bearing at the abutment.

Freyssinet mission :

Freyssinet (Thailand) was liaise form the main contractor of the accident. Freyssinet (Thailand)'s engineers work closely with main contractor to provide the best practice solution. Lifting of bridge superstructure has been introduced. Freyssinet (Thailand) provide the full service of design check and control of lifting process.
